FOREWORD

This report is one of a series of provincial reports on the results of the 1980 Census of Population and Housing conducted on May 1, 1980.

Demographic data presented herein consist of population distributions according to age, sex, marital status, highest grade completed and literacy. Other bases as gainful occupation, industry and migration are included likewise.

In the other aspect of the census, the following housing characteristics are considered: type of building, structural characteristics, floor area, type of tenure, use and source of water supply, lighting, type of toilet facilities, kind of cooking fuel used and appliances.

Subsequent issues will be the National Summary (Volume II) containing summary data on the final provincial reports and the Special Volume on National Capital Region (Metro Manila Area) which will cover data on the social, economic and demographic characteristics of the region.

Grateful acknowledgment is due the National Census Coordinating Board, government agencies, committees and the local coordinating boards for their invaluable assistance and cooperation.

TITO A. MIJARES

E	<i>PH Form 4 – Collective Household Questionnaire</i>	167

Explanatory Text

GENERAL

INTRODUCTION

The National Census and Statistics Office conducted in May 1980, the 1980 Census of Population and Housing. This type of Census was also undertaken in May 1970. In May 1975 the Census of Population was taken as Phase I of the 1975 Integrated Census of the Population and Its Economic Activities. This nationwide undertaking was designed to obtain comprehensive data on the size, distribution, structure, change and socio-economic characteristics of the population and to take inventory of the housing accommodations, their geographic location, structural characteristics, available facilities, etc.

The population report contains data gathered from private households as well as collective households, while data on housing were collected from private households only.

It should be emphasized at this point that a complete enumeration of all households throughout the country was made but only sample household questionnaires representing 20 percent of the listed households were processed and the data published in this volume. In so doing, however, the total population count by barangay, male and female, obtained from the listing sheet taken simultaneously during the enumeration was maintained in computing the weights or expansion factors. It should also be noted that data on Tables 1 to 4 of the population tables refer to total population, that is, the population of the private households plus the collective households while Tables 5 to 10 cover exclusively the private household population.

Pursuant to the provision of Batas Pambansa Bilang 72, a final count of the population, by sex at barangay level was submitted to the President and was approved under Proclamation No. 2170 dated March 12, 1982. This report was published separately in 74 provincial volumes.

AUTHORITY FOR THE 1980 CENSUS

Under Commonwealth Act No. 591, the National Census and Statistics Office is authorized "to prepare for and undertake all censuses of population, agriculture, industry and commerce."

It may be mentioned in this regard that sometime in February 1980 Parliamentary Bill No. 809 was presented at the Batasang Pambansa, providing for the taking of an integrated census every ten years beginning 1980, with May 1 of every census year as the reference date. This bill was approved into Batas Pambansa Bilang 72 on June 11, 1980, more than one month after the start of enumeration.

INTER-AGENCY PARTICIPATION

The expertise and technical advice of the National Economic and Development Authority Inter-Agency Committee on Population and Vital Statistics and its Technical Working Group on 1980 Census of Population and Housing played a vital role in the successful undertaking of the census.

The Committee's main function was to review the questionnaire, methodologies, concept, tabulation and other related aspects of the census in the production of data and development of systems that would produce more reliable and accurate result. It had for its chairman the Dean of the University of the Philippines Population Institute (UPPI) and for its members, one representative each from the Ministries of Human Settlements (MHS), National Defense (MND), Education and Culture (MEC), Health (MOH) and Local

EXPLANATORY TEXT

Government and Community Development (MLGCD); the Commission on Population (POPCOM); National Economic and Development Authority (NEDA); and two representatives from the National Census and Statistics Office (NCSO). The Technical Working Group (TWG) for the 1980 Census of Population and Housing was headed by the Chief of the National Census and Household Surveys Department of NCSO and the members were representatives from the MHS, EPRS-NEDA, SCO-NEDA, POPCOM, UPPI, MOH, MEC, and the National Housing Authority (NHA).

Recommendations were likewise solicited from other government agencies for questions that should possibly be included in the population and housing portions in order to fill their data needs.

As early as August 1977, an NCSO Technical Committee for censuses was created. Ranking officials of the National Census and Statistics Office comprised the committee, with the Assistant Executive Director as Chairman, the Chief of the National Census and Household Surveys Department (NCHSD) as Vice-Chairman and Heads of six other departments and staff offices as members.

The committee coordinated with the Inter-Agency Committee and TWG of the NEDA on the technical aspect of the census and rendered a monthly progress report to the Executive Director. It provided the overall direction of the activities of the different subcommittees on census. The two subcommittees created, the Sub-Committee on Population and Housing Census and the Sub-Committee on Operations and Logistics Support, were directly charged with the preparatory work for the census undertaking.

CENSUS BOARDS

A systematized involvement of government agencies and instrumentalities was made possible largely through the concerted efforts of the members of the National Census Coordinating Board (NCCB) and the Provincial, City and Municipal Census Boards. The national board was created by NEDA Memorandum Order No. 4-80, dated April, 1980 and the local boards, by Memo Order No. 5-80, dated April 1, 1980, by virtue of the powers vested in the Minister of Economic Planning under Section 3 of Presidential Decree No. 1200.

The NCCB was headed by the Minister of Economic Planning as Chairman with the Executive Director as Executive Officer. Named as members were the Ministers of Agriculture, Budget, Education and Culture, Finance, Human Settlements, Public Works, Justice, Labor, Local Government and Community Development, National Defense, Natural Resources, Public Highways, Public Information and Transportation and Communication. Rules and regulations necessary for the successful undertaking of the census were issued by the Board.

At the local government level, similar functions were carried out by the Provincial City and Municipal Census Boards. The Provincial Governor headed the Provincial Census Board while the Division Superintendent of Schools was Vice-chairman. Members were the Highway District Engineer, Provincial Auditor, Provincial Commander of the Philippine Constabulary, the Provincial Development Officer and the Provincial Agriculturist. The City Census Board was composed of the City Mayor as Chairman; City Superintendent of Schools, Vice-chairman; and the City Engineer, City Assessor and City Development Officer, members. Finally, the Municipal Census Board had for its Chairman the Municipal Mayor and ably assisted by the District Supervisor as Vice-chairman. The members were the Municipal Agriculturist, Station Commander, Municipal Treasurer and the Municipal Development Officer.

EXPLANATORY TEXT

For each of these local census boards, the Provincial Census Officer, City Census Officer and the Municipal Census Officer were designated Executive Officer of their respective Board.

CENSUS ORGANIZATION

The overall direction and instructions for the census undertaking emanated from the Executive Director of the National Census and Statistics Office or in his absence, the Assistant Executive Director.

Assisted by the Task Force from the Central Office and in coordination with the local census boards, the Regional Census Officers and the Provincial Census Officers directly supervised the field operations in their respective areas. The services of District Supervisors, Head Teachers and elementary school teachers from public schools were utilized as City/Municipal Census Supervisors, Team Supervisors and Enumerators in that order.

During the field operations, the 1980 Census Operations Center under the overall supervision of the National Census and Household Surveys Department Chief, was the operating body that monitored the overall operations. Lending support to the center were the Administrative and Fiscal Services Staff.

METHOD OF ENUMERATION AND USE OF SAMPLING

The household was used as the enumeration unit and a complete listing of dwelling units, including vacant ones, was done.

A combination of complete enumeration and sampling was adopted. While all households were asked on the count of the population and housing characteristics, only twenty percent (20%) were asked on other characteristics. The selection of sample households was done systematically with a random start from a listing of households which was prepared simultaneously with the enumeration.

Using PH Form 2 (Common Private Household Questionnaire) and with an 80 percent coverage, the items asked on population were household membership, relationship to head, line number of mother, sex, date of birth, age as of last birthday and marital status. For the housing items, the type of building and the construction materials of roof and outer walls, number of rooms, floor area of the dwelling unit and the year the building was built were asked.

In addition to the population and housing items just mentioned, additional information were asked using PH Form 3 (Sample Private Household Questionnaire) from the 20 percent samples such as language or dialect generally spoken at home, citizenship, usual residence of mother at person's birth, residence of person in 1975, ability to speak Pilipino and English, school attendance, highest grade completed, literacy, economic activity of the person, place of schooling or work, fertility, nature of occupancy of the dwelling unit and housing facilities and conveniences.

Collective households were enumerated using PH Form 4, where the information asked were the same as those in PH Form 2, excluding housing items.

PLACE WHERE ENUMERATED

All persons were enumerated in their usual place of residence, which is the geographic place (street, barangay, sitio, municipality or province) where the enumerated person usually resides. As a rule, it is the place where he usually sleeps; therefore, it may be the same as or different from the place where he was found at the time of the census.

EXPLANATORY TEXT

POST ENUMERATION SURVEY

Originally the plan was to conduct a Post Enumeration Survey covering the whole country. For lack of funds the survey had to be confined to Metro Manila. Its purpose was to determine the extent of underenumeration or overenumeration in the 1980 Census of Population and Housing.

A sample of 132 barangays was selected. However, in 59 barangays which were divided into two or more enumeration areas (EAs), an enumeration area was chosen as sample.

A complete listing was made of households in the sample barangays/EAs using PH Form 1-B. Twenty percent of these households were selected as sample households and interviewed using PH Form 2, which was the same questionnaire used for non-sample households during the main enumeration. The housing portion of this form was disregarded.

CONTENT AND COVERAGE OF THE PUBLICATION

In this publication, the population and households were described according to the respective items listed below:

Population Items	Housing Items
Age	Type of Building
Sex	Type of Occupancy
Marital Status	Construction Materials of Roof and Outer Walls
Highest Grade Completed	Year Built
Literacy	Floor Area of Dwelling Unit
Language/Dialect Spoken in the Household	Tenure of Owner-Occupant with Respect to the Land
Gainful and Non-Gainful Occupation	Kind of Lighting Facilities
Major and Minor Industry	Use and Source of Water Supply
Migration	Type of Toilet Facilities
	Kind of Cooking Fuel
	Household Appliances

The above items are presented in the ten population tables and nine housing tables of this report.

Except for figures on total population and sex, all other characteristics were based on a 20 percent sample.

Aside from these published tables, 10 other tables on the above characteristics plus 6 statistical tables dealing on ever-married women 15 years old and over are also available to statistical users.

DEFINITION OF TERMS AND CONCEPTS

I – POPULATION

BARANGAY

A barangay is the smallest political unit in the country and generally its enumeration is

EXPLANATORY TEXT

assigned to one enumerator. For enumeration purposes, a large barangay is usually split into parts and each part is called an enumeration area (EA).

ENUMERATION AREA

An enumeration area (EA) is a delineated area assigned to one enumerator, usually consisting of about 300 households. A barangay or part of a barangay may have been designated as an enumeration area.

URBAN AND RURAL AREAS

The same concepts used in the 1970 and the 1975 Censuses were followed in classifying areas as urban. According to these concepts, urbanized areas consist of:

1. In their entirety, all cities and municipalities having a population density of at least 1,000 persons per square kilometer.
2. Poblaciones or central districts of municipalities and cities which have a population density of at least 500 persons per square kilometer.
3. Poblaciones or central districts (not included in 1 and 2), regardless of the population size, which have the following:
 - a. Street pattern, i.e., network of streets in either parallel or right-angle orientation;
 - b. At least six establishments (commercial, manufacturing, recreational and/or personal services); and
 - c. At least three of the following:
 - 1) A town hall, church or chapel with religious services at least once a month;
 - 2) A public plaza, park or cemetery;
 - 3) A market place or building where trading activities are carried on at least once a week;
 - 4) A public building like a school, hospital, puericulture and health center or library.
4. Barangays having at least 1,000 inhabitants which meet the conditions set forth in 3 above, and where the occupation of the inhabitants is predominantly non-farming or fishing.

All areas not falling under any of the above classifications are considered rural.

PERSONS ENUMERATED IN A PRIVATE HOUSEHOLD

The following were counted and enumerated as members of the household:

1. Persons whose usual place of residence is the place where the household lives and present at the time of visit of the enumerator, except those born after 12:01 A.M., May 1, 1980;
2. Persons whose usual residence is the place where the enumerated household lives, but temporarily away at the time of enumeration, such as:
 - a. persons temporarily away on vacation, business or pleasure trip or any other purpose in the Philippines who are expected to be back within six months,

EXPLANATORY TEXT

- or within one year, if abroad;
 - b. students who usually go home to their respective households at least once a week;
 - c. persons working elsewhere who usually go home to their respective households at least once a week;
 - d. patients confined in hospitals for not more than six months at the time of enumeration of the household, except those confined (1) as inmates (not patients in wards for temporary confinement) in tuberculosis pavilions; (2) in mental hospitals; (3) in leprosaria or leper colonies; and (4) in rehabilitation centers for drug addicts;
 - e. trainees in the Armed Forces of the Philippines, if their training is not more than six months;
 - f. convicts and detainees in provincial or municipal/city jails or military camps, who have been confined for not more than 6 months at the time of enumeration of the household, except those who have been sentenced for more than 6 months (including those whose sentence is on appeal), even though just confined; and
 - g. officers and crew members of coastal, interisland, or fishing vessels; officers and crew members of ocean-going vessels who usually go home to their household at least once a year.
3. Boarders of the household who are working, looking for work or studying, and who do not go home at least once a week;
 4. Employees of household-operated enterprises who eat and sleep with the household and who do not go home at least once a week;
 5. Persons (other than those in "3" and "4") whose usual place of residence is elsewhere, but who have been away from their usual place of residence for more than 6 months;
 6. Members of the Armed Forces of the Philippines including draftees, sleeping most of the nights with the household, except those who only board or lodge with the household and who usually go home at least once a week; in such a case, they will be enumerated in their own household;
 7. Persons found in the household who have no usual place of residence elsewhere;
 8. Persons found in the household who are not certain of being enumerated elsewhere;
 9. Persons who consider the dwelling unit of the household as their usual place of residence but are living within the premises of a foreign embassy, ministry, legation or consulate, including non-Filipino employees who have been residents of the Philippines before such employment;
 10. Citizens of foreign countries and Filipinos (balikbayan) who have resided or expect to reside in the Philippines for more than one year from arrival;
 11. Persons who sleep in the same dwelling unit but may not be able to take all or some of their meals with the household because of the nature of their work or other similar reason (they take their meals at place of work, etc.), should be considered as part of the household; and
 12. A household member who is alive as of 12:01 A.M., May 1, 1980, but dies prior to the enumeration of the household.

EXPLANATORY TEXT

PERSONS TOTALLY EXCLUDED FROM THE ENUMERATION

Totally excluded from the population count of the Philippines were:

1. Foreign ambassadors, ministers, consuls or other diplomatic representatives, and members of their households (except Filipino employees and non-Filipino employees who had been residents of the Philippines prior to said employment);
2. Citizens of foreign countries living within the premises of an embassy, legation, chancellory or consulate;
3. Officers and enlisted men of U.S. Military or Naval Forces and non-Filipino members of their households, irrespective of residence; foreigners who are civilian employees in U.S. military or naval stations and member of their families living within the premises of said stations or reservation; (Note: for foreigners who are civilian employees of said stations living outside the station or reservation, see Item 5).
4. Citizens of foreign countries who are Chiefs and officials of international organizations like UN, ILO or USAID, who are subject to reassignment to other countries after their tour of duty in the Philippines, and members of their families;
5. Citizens of foreign countries together with non-Filipino members of their families, who are students or who are employed, or have business in the Philippines and have been in the Philippines or expect to stay in the country for one year or less from arrival;
6. Citizens of foreign countries and Filipinos with usual place of residence in a foreign country, who are visiting in the Philippines and expect to stay in the country for one year or less from arrival (e.g. a *balikbayan* who will return to his usual place of residence abroad after a short vacation or visit in the Philippines);
7. Citizens of foreign countries in refugee camps/vessels; and
8. Residents of the Philippines on vacation, pleasure or business trip, etc. abroad, who have been away or expected to be away from the Philippines for more than one year from departure.

USUAL PLACE OF RESIDENCE

The term refers to the geographic place (street, sitio, barrio/barangay, municipality or province) where the enumerated person usually resides. As a rule, it is the place where he sleeps most of the time; hence, it may be the same as or different from the place where he was found at the time of the census.

HOUSEHOLD

A household usually consists of a group of persons who sleep in the same dwelling unit and have common arrangements for the preparation and consumption of food. A person who lives alone is considered as one separate household. Although in most cases a household consists of a related family group, some household members may have no relationship to the central group. Boarders and servants, for instance are counted as part of a particular household if they take their meals with the household and sleep in the same dwelling unit. Persons who sleep with a household but individually cook their meals or eat elsewhere are each considered as single-person household.

EXPLANATORY TEXT

Three generations may be living in one dwelling unit. If they are divided into two or more groups whose eating arrangements are independent from each other, each group is counted as a separate household.

PERSONS NOT LIVING IN HOUSEHOLD

Falling under this category are persons living in collective living quarters such as welfare institutions (orphanages and homes for the aged or infirm); penal and corrective institutions (jails, national penitentiary, and reformatory institutions); hospitals, sanatoria, leprosaria, and nurses homes; dormitories and boarding schools; lodging houses such as hotels, tourist homes and the like; military camps and others.

Most of these institutions house inmates for whom care or custody is provided by resident staff members, or persons residing in group quarters or in housing units on the institutional grounds.

Private families living within such institutions, however, are excluded from the classification, as well as persons (employees, students, etc.) who go home to their families on weekends or days off. Persons found in lodging houses, but who are on vacation or business trips and whose absence from home does not exceed six months on the day of enumeration, are likewise not counted as part of the institutional population.

RESPONDENT

A respondent is any responsible adult member of the household who furnished the information or answers to questions during the interview.

LANGUAGE/DIALECT GENERALLY SPOKEN IN THE HOUSEHOLD

This refers to the language or dialect spoken most of the time by members of the household. In cases where two or more languages/dialects are spoken by household members, the one most often used in conversations among members of the family of the head when most of them are gathered together is considered as the language/dialect generally spoken in the household.

HEAD OF HOUSEHOLD

The person responsible for the care and organization of the household is generally considered as the head of the household. He usually provides the chief source of income for the household.

In the case of a household consisting of two or more unrelated persons sharing a dwelling unit and sharing the same cooking facilities and meals, the head is usually the eldest male or female in the group regarded as such by the other members.

RELATIONSHIP TO HEAD OF HOUSEHOLD

This determines how each household member is related to the head, who is usually the husband or father, although in his absence or if incapacitated, the wife may be designated as head.

1. Spouse — a woman/man married to and living with the head. This includes legal marriages as well as common-law relationships.
2. Son/daughter — the head's own child, stepchild, or adopted child.

EXPLANATORY TEXT

3. Son-in-law/daughter-in-law – refers to a household member related to the head by marriage to his daughter or son.
4. Grandson/granddaughter – child of the son or daughter of the head.
5. Other relative – a household member related to the head by blood, marriage, or adoption. Father, mother, aunts, nephews, parents-in-law and cousins are examples.
6. Others – any person in the household who is usually a non-relative of the head. Boarders and servants fall under this category. Certain members of the household who are related to the head by blood or affinity, but are actually boarders or servants in the household, are classified under "Others".

For collective households and group quarters, the question on relationship refers to the person's relationship to the institution or establishment, and not to the person recorded as head.

AGE AND DATE OF BIRTH

Data on the age of the population were obtained by asking the respondent the month and year of birth and the age itself of the household member before May 1, 1980. To ensure accuracy, a conversion table on age before May 1, 1980 was prepared for the use of enumerators, editors/coders and verifiers.

MARITAL STATUS

This refers to the civil status of all persons 10 years old and over. A person in this age group is classified as single, married, widowed, separated or divorced, or civil status unknown, based on the following definitions:

- a. Single – If never been married.
- b. Married – Legally married or living consensually with husband/wife without benefit of a legal marriage. A person classified as "married" includes one who remarried after having been widowed, separated or divorced or one temporarily separated from spouse owing to the nature of work, illness or service in the Armed Forces.
- c. Widowed – A person whose spouse died and who has not remarried at the time of enumeration.
- d. Separated – If permanently separated from spouse either legally or otherwise, due to marital discord.
- e. Divorced – If bond of matrimony has been dissolved through a court decree and is therefore free to remarry.
- f. Unknown – If civil or marital status is either not known to the respondent, or the respondent himself refuses to reveal the marital status of such person.

CITIZENSHIP

Citizenship is defined as the legal nationality of a person. A citizen is a legal national of the country of the census; an alien is a non-national of the country.

LITERACY

A person is considered literate if he is able to read and write a simple message in any language or dialect.

EXPLANATORY TEXT

HIGHEST GRADE COMPLETED

This has reference to the specific grade or year completed in elementary school, high school, college or university, by persons 7 years of age and over. Academic degree holders are classified according to the title of the degree received or the major field of study undertaken.

USUAL OCCUPATION

This refers to the specific job or kind of work that a person, who works most of the year, is usually pursuing, or if unemployed at the time of enumeration, it is the kind of work he used to do most of the year. A person is considered as usually working most of the year if he works for at least 10 hours a week for 26 weeks either for pay in cash or in kind, for a fee or profit in own farm, business or establishment or practice of a profession and without pay on family farm or enterprise. This particular group of workers is referred to as gainful workers.

For persons who do not work most of the year, the usual occupation relates to the non-gainful activities they usually do most of the year. Among such persons are housekeepers, students, pensioners, retired and disabled. However, a person who is housekeeping or schooling and also works in a gainful activity was reported as gainfully employed, even if more time was spent housekeeping or studying, as the case may be.

INDUSTRY

Industry refers to the specific character and nature of business or industry or the place where the work is being performed in connection with the job or occupation reported for a person.

EVER-MARRIED WOMAN

This refers to a woman who has already entered married life. Marriage here may either be legal or consensual union. At the time of enumeration the ever-married woman may still be married, or already widowed, separated or divorced.

II – HOUSING

BUILDING

A building is any independent free-standing structure comprising one or more rooms or other spaces, covered by a roof and enclosed within external walls or dividing walls with adjacent building which usually extend from the foundation to the roof. It usually contains one or more rooms internally connected with one another. A building therefore, is any structure intended for dwelling, storage, factory, shelter or for some other useful purposes.

For purposes of the 1980 Census of Population and Housing, only the following buildings were listed and assigned building serial numbers:

- a. A house or any kind of building or shelter where people were actually living;
- b. A residential building (house, apartment or accessoria, condominium) that was vacant;

EXPLANATORY TEXT

- c. Hotel, motel, lodging house, dormitory or camp (construction, logging, mining, etc.) in operation;
- d. A commercial, office, industrial, agricultural or other kinds of buildings with one or more dwelling units (containing a kitchen/kitchen-dining room, living room and a bedroom, and with separate entrance) which were all vacant.

The different types of buildings are:

1. **Single house** – a complete structure intended for one household. It includes the so-called “nipa hut” or a small house that is built as a more or less permanent dwelling unit.
2. **Duplex** – a structure intended for two households, with complete living facilities for each. It is divided either vertically or horizontally into two separate dwelling units which are usually identical.
3. **Apartment/accesoria/condominium/row house**

An apartment is a structure usually of several stories, made up of three or more independent entrances from internal halls or courts. It differs from an accesoria in that an apartment has one common entrance from the outside.

An accesoria is usually a one or two-floor structure divided into three or more dwelling units, each dwelling unit having its own separate entrance from the outside. Another name for accesoria is row house.

A condominium is usually a high-rise building where the dwelling units are owned individually but the land and other areas and facilities are owned in common.

4. **Improvised (barong-barong)** – a makeshift or roughly constructed house usually built with salvaged materials.
5. **Commercial/industrial/agricultural** – buildings not intended for human habitation but used as dwelling units at the time of the census.

Commercial – a building used for transacting business or rendering professional services, such as a storage or an office building.

Industrial – a building used for processing, assembling, fabricating, finishing, manufacturing or packaging operations, such as a factory or a plant.

Agricultural – any structure used for agricultural purposes, such as a barn, warehouse, rice mill, etc.

6. **Other housing unit (natural shelter, boat, etc.)**

This refers to living quarters which are not intended for human habitation nor located in permanent buildings but which are, nevertheless, used as living quarters at the time of the census. Caves, other natural shelters and mobile housing units such as trailer, barge, boat, etc., fall within this category.

7. **Hotel, lodging house, dormitory, etc.** – This group comprises permanent structures which provide lodging and/or meals on fee basis. Hotels, motels, inns, boarding houses, dormitories, pensions and lodging houses fall within this category.
8. **Institutional (hospital/convent/school dormitory/penal institution, etc.)** – a building intended for persons confined to receive medical, charitable, or other care treatment such as jails and penal colonies, and other buildings like convents, school dormitories, etc.
9. **Other collective living quarters** – any structure or shelter which does not fall under items 7 and 8. Included in this category are camps which are defined sets of

EXPLANATORY TEXT

premises originally intended for the temporary accommodation of persons with common activities or interests like military camps, and other camps established for the housing of workers in mining, agriculture, public works or other types of enterprises.

DWELLING UNIT

A dwelling unit is a separate and independent place of abode intended for habitation by one household, or one not intended for habitation but occupied as living quarters by a household at the time of the census.

Dwelling units counted included those that are occupied and those that are unoccupied.

CONSTRUCTION MATERIALS OF ROOF

The kinds of materials used are as follows:

1. Galvanized iron/aluminum
2. Tile/concrete/brick/stone
3. Asbestos
4. Cogon/nipa
5. Makeshift/salvaged materials
6. Others (anahaw, etc.)

CONSTRUCTION MATERIALS OF OUTER WALLS

The kinds of materials may be any of the following:

1. Galvanized iron/aluminum
2. Tile/concrete/brick/stone
3. Wood/plywood
4. Mixed tile/concrete/brick/stone and wood/plywood
5. Asbestos
6. Bamboo/sawali
7. Cogon/nipa
8. Makeshift/salvaged materials
9. Others (anahaw, etc.)

If the roof or outer walls are constructed of two or more materials the material most used was reported.

YEAR BUILDING WAS BUILT

This refers to the year when the extent of construction permitted occupancy for living purposes. The year reported was the particular year when the occupancy started or when the building was fit for occupancy even if not occupied.

NUMBER OF ROOMS IN THE DWELLING UNIT

A room is defined as a space in a dwelling unit or other living quarters enclosed by walls reaching from the floor to the ceiling or roof covering, or at least to a height of 1.8 meters which are of permanent or semi-permanent structure, of a size large enough to hold a bed for an adult or at least has an area of 3 square meters.

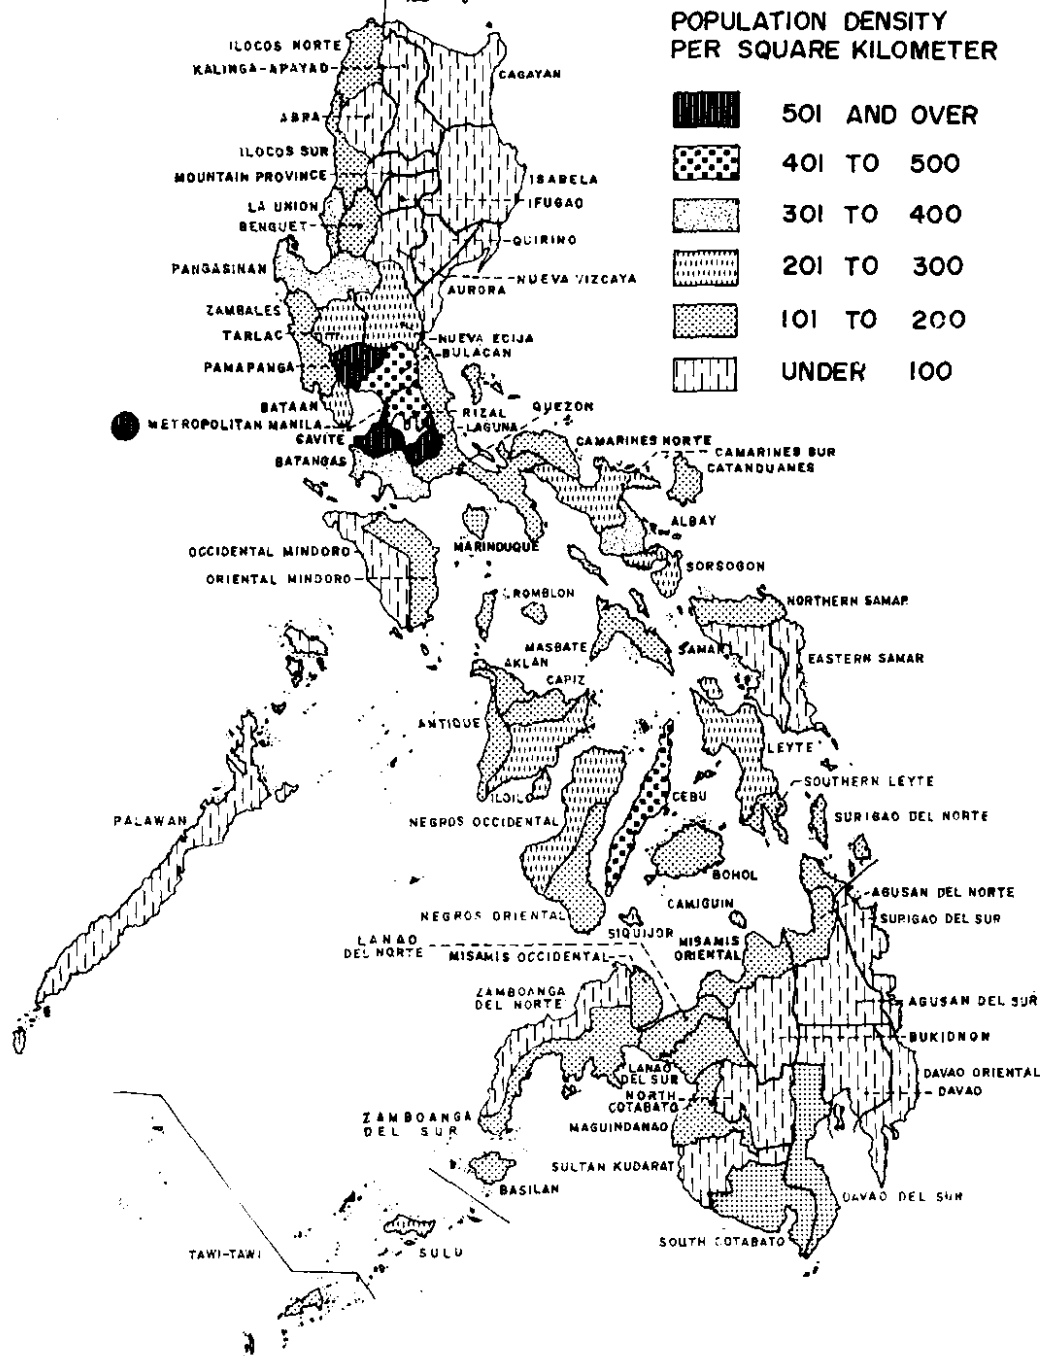

EXPLANATORY TEXT

The total number of rooms reported included the bedrooms, dining room, living room, kitchen, roofed veranda, library or music room and other separate spaces used or intended for dwelling purposes, as long as they meet the criteria of walls and floor space. Passageways, lobbies, bathrooms and toilets or rooms used exclusively as store/shop/clinic/grains storage (nobody sleeps therein) were not counted as rooms even if they meet the criteria.

FLOOR AREA OF DWELLING UNIT

This refers to the space enclosed by the exterior walls of the dwelling unit, or the space measured inside the outer walls of the spaces that are counted as rooms. In case of several floors, the area of each floor in square meters was taken and added together to get the total floor area of the dwelling unit. Areas of floor spaces that are not considered rooms such as bathroom, toilet, storeroom, passageway were excluded in determining the floor area.

POPULATION DENSITY OF THE PHILIPPINES BY PROVINCE : 1980

Philippines: A Brief Analysis

The Philippines consists of a group of islands on the western rim of the Pacific and stretches more than a thousand kilometers north to south between Taiwan and Borneo. The country strategically lies within the arc of nations that sweeps southeastward from mainland Asia to Australia. North of the country are the Republic of Taiwan and the People's Republic of China; to the northeast is Japan, and to the south and southwest are the other Southeast Asian nations of Burma, Thailand, Kampuchea, South Vietnam, Laos, Malaysia, Singapore and Indonesia. At its extreme southeast are Papua New Guinea, Australia and New Zealand.

The total land area of the Philippines is 300,000 square kilometers with Luzon, the biggest island, accounting for 141,395 square kilometers and Mindanao, the second largest, for 101,999 square kilometers. There are 7,100 islands and islets within its territory, making it one of the largest archipelagos in the world in terms of number of component islands and islets.

The regional delineation in the 1980 census classifies the country into 13 geographical-administrative regions. Seventy-three provinces, 60 cities, 1,505 municipalities and 40,162 barangays comprise the 13 regions of the country.

The City of Manila is the official capital of the Philippines. It is the country's main port of entry, the hub of trade and commerce, and the seat of cultural and intellectual activities. Being a gateway to the various islands and the center of Philippine life, Manila is the heartland of the entire archipelago.

The Philippines has varied topography. Its four major lowlands - Central Plains of Luzon, Cagayan Valley, Agusan and Cotabato River Valley, contrast sharply with the adjacent high mountain areas of Central and Eastern Cordillera and the Zambales Mountains. Diversity is further contributed by the existence of several extensive plateaus such as the Bukidnon-Lanao Plateau in Northern and Southwestern Mindanao.

Mountain ranges traversing the country form natural barriers. The most extensive of these ranges is the Sierra Madre of Luzon which extends from Cape Engaño at the extreme northeast to a point east of Laguna de Bay. A group of highly complex mountains lying parallel to the west of Northern Luzon are the Cordillera Mountains. Providing a link between these two mountain ranges are the Caraballo Mountains. The highest peak in the archipelago is Mt. Apo in Mindanao with an elevation of approximately 2,954 meters above mean sea level. Mt. Pulog, located in Luzon, is the second highest peak and rises to a height of 2,928 meters above mean sea level.

A BRIEF ANALYSIS

Of approximately 52 volcanoes scattered all over the islands, at least 13 are active. The famous Mayon Volcano in Bicol possesses an almost perfect cone with slopes seemingly coming to a point at the summit. Also known is Taal Volcano in Region IV, one of the lowest volcanoes in the world. It is situated in the midst of Taal Lake and holds another deeper lake within its own center.

Few countries in Asia can boast of an infinite variety and beauty of its tourist spots as the Philippines. Interesting highlights in and around Manila alone are the Rizal Park; the historic Walled City of Intramuros; the San Agustin Church, the country's oldest stone church; the University of Santo Tomas - founded in 1611, the oldest in the Far East, out-dating even Harvard University of the United States; the Cultural Center of the Philippines; the Folk Arts Theater; the famous sunset of Manila Bay; and the Nayong Pilipino for a miniature overall view of the country, to name a few.

Among the country's natural and man-made wonders are Tagaytay City with its view of Taal Volcano; the famous bamboo organ of Las Piñas; the hot springs of Los Baños; Pagsanjan Falls; the Banaue rice terraces; Mayon Volcano with its perfect cone; the Hundred Islands of Pangasinan; and the Tiwi Hot Springs. Top tourist attractions are the Ati-Atihan Festival of Aklan, the Moriones Festival of Marinduque, the Harvest Festival of Lucban, Quezon, the Cañao Festival of Mountain Province and the Santacruzán at the Nayong Pilipino and neighboring communities.

Logging, lumber and timber production, plywood and veneer manufacturing, mining, sugar milling and refining, and the manufacture of copra and coconut oil, footwear, textiles, chemicals, pharmaceutical products, etc. are among the principal industries of the Philippines.

POPULATION

As of May 1, 1980 the Philippines registered a total population of 48,098,460 or an increase of 6,027,800 persons over the last 5 years. The population, composed of 24,128,755 males and 23,969,705 females, grew at an average annual geometric growth rate of 2.71 percent. This marked a continuing, though very small (0.07 percentage point), decline in the annual growth rate; the initial decline of 0.23 percentage point was recorded in the first half of the seventies.

During the period between 1975 and 1980, 20.1 persons per square kilometer on the average were added to the 1975 national population density of 140.2 persons per square kilometer.

The level of urbanization or the proportion of the urban population to the total population indicates the concentration of the population in urban areas. The level of urbanization (37.31%) for the country as a whole has somewhat improved, higher by 3.92 percentage points and 5.48 percentage points than the 1975 and the 1970 proportions, respectively. The gain in the proportion of urban population was larger for females (2.15 percentage points) than for males (1.77 percentage points). In contrast, the proportion of urban males increased by 1.00 percentage point during the period 1970-1975 as against an increase of 0.56 percentage point for urban females. Meanwhile, the decline in the proportion of rural population between 1975 and 1980 was greater for males (2.17 percentage points) than for females (1.75 percentage points). The corresponding decreases during the period 1970 to 1975 were 0.18 percentage point and 1.38 percentage points. The increase in the proportion of urban population may be attributed to natural increase (births minus deaths) in

A BRIEF ANALYSIS

population, migration from rural to urban areas, or a reclassification to urban barangays of rural barangays meeting the criteria of the urban category, based on the 1970 urban definition.

A comparative breakdown of the population classified according to urban-rural residence and sex is shown below.

**TABLE A — URBAN-RURAL POPULATION BY SEX, PHILIPPINES:
1970, 1975 AND 1980**

Area Classification and Sex	1980		1975		1970	
	Number	Percent	Number	Percent	Number	Percent
Total	<u>48,098,460</u>	<u>100.00</u>	<u>42,070,660</u>	<u>100.00</u>	<u>36,684,486</u>	<u>100.00</u>
Male	24,128,755	50.17	21,276,224	50.57	18,250,351	49.75
Female	23,969,705	49.83	20,794,436	49.43	18,434,135	50.25
Urban	<u>17,943,897</u>	<u>37.31</u>	<u>14,046,527</u>	<u>33.39</u>	<u>11,677,820</u>	<u>31.83</u>
Male	8,765,276	18.23	6,925,264	16.46	5,673,570	15.46
Female	9,178,621	19.08	7,121,263	16.93	6,004,250	16.37
Rural	<u>30,154,563</u>	<u>62.69</u>	<u>28,024,133</u>	<u>66.61</u>	<u>25,006,666</u>	<u>68.17</u>
Male	15,363,479	31.94	14,350,960	34.11	12,576,781	34.29
Female	14,791,084	30.75	13,673,173	32.50	12,429,885	33.88

- The sex ratio or the number of males for every 100 females fluctuated from 99.00 in 1970 to 102.32 in 1975 and down to 100.66 in 1980. While the country as a whole had a nearly balanced number of males and females, urban areas had only 95.50 males for every 100 females as against a sex ratio of 103.87 in rural areas.

The graph of the age-sex distribution of the population exhibits an expansive pyramid structure typical of the age-sex structure in most developing countries where birth rates range from high to moderate. As shown in Figure 1 and Table 3, the population (male and female) decrease with advancing age. This pattern holds true whether in urban or rural areas, except for a slight deviation among urban females aged 15-19 years. Excess in urban females belonging to this age group is reflective of the migration characteristics commonly observed among this group who usually move to urban areas to look for work or for some other reasons.

A BRIEF ANALYSIS

AGE COMPOSITION

The Philippines still has a high proportion of the younger age group (0-14 years) although a downward trend has been observed since 1970. The 0-14 age group comprises 42.04 percent of the total population, decreasing by 1.92 percentage points and 3.64 percentage points from the corresponding 1975 and 1970 proportions.

Maintaining an upward trend, the productive age group (15-64 years) constitutes 54.56 percent in 1980. The proportion of the older age group (65 years and over) increased by 0.54 percentage point between 1975 and 1980, after a slight decrease of 0.04 percentage point between 1970 and 1975.

Table B shows comparative figures in the age composition of the population in 1970, 1975 and 1980.

A BRIEF ANALYSIS

**TABLE B — AGE COMPOSITION OF THE POPULATION, PHILIPPINES:
1970, 1975 AND 1980**

Age Composition	1980		1975		1970	
	Number	Percent	Number	Percent	Number	Percent
Total ⁹⁴⁹⁰	<u>48,098,460</u>	<u>100.00</u>	<u>42,070,660</u>	<u>100.00</u>	<u>36,684,486</u>	<u>100.00</u>
0 - 14 years ²³⁹⁴³⁷⁰²	20,221,547	42.04	18,493,255	43.96	16,757,313	45.68
15 - 64 years ³⁴⁵⁰⁵³²⁴	26,240,572	54.56	22,375,237	53.18	18,864,652	51.42
65 years and over ²⁰⁶⁰⁰⁸⁶	1,636,341	3.40	1,202,168	2.86	1,062,521	2.90

The continuous rise in the proportion of persons in the productive or working age group leads to a decline in the dependency ratio (number of dependents for every 100 persons in the productive age group). In 1980 the dependency ratio was 83.30, dropping from the ratio of 88.02 in 1975 and 94.46 in 1970. The dependency ratio in 1980 indicates a relatively reduced economic burden placed upon the working age group by the younger and older age groups, other things being equal.

With 58.42 percent of the urban population in the productive age group, the urban dependency ratio (71.17) is much lower than that in rural areas (91.36) where 52.26 percent of the rural population belong to the productive age group.

Meanwhile, the country's population is undergoing an aging process as indicated by a steadily rising median age, from 16 years in 1970 to 17 years in 1975 and 18 years in 1980.

MARITAL STATUS

After gaining 3.36 percentage points over a span of five years, married persons predominated all other marital status categories as they constituted 50.63 percent of the population 10 years old and over in 1980. Only 44.79 percent remained never married, a decline of 4.12 percentage points from 1975 to 1980, following a slight increase of 0.59 percentage point from 1970 to 1975. The proportion of widowed (3.96%), divorced or separated (0.54%) and not stated (0.08%) increased by 0.54 percentage point, 0.18 percentage point and 0.04 percentage point, respectively, over the 1975 figures, reversing the trend between 1970 and 1975.

Never married males comprised 46.85 percent of the males 10 years old and over, representing a decrease of 4.43 percentage points over the 1975 proportion while married males constituted 50.66 percent or an increase of 4.05 percentage points. The corresponding proportions for females were 42.76 percent and 50.59 percent, or a drop of 3.77 percentage points for never married females and a gain of 2.65 percentage points for married females. Wives were more likely to outlive their husbands as indicated by a higher propor-

A BRIEF ANALYSIS

tion of widowed females (5.83%) than widowed males (2.07%); the gap between these two proportions widened slightly over the last 5 years. Divorced or separated males accounted for 0.35 percent or an increase of 0.09 percentage point. The corresponding figure for females was 0.72 percent or an increase of 0.25 percentage point. The proportion who did not disclose their marital status increased slightly by 0.04 percentage point and 0.06 percentage point, respectively, for males and females (Table C).

**TABLE C – POPULATION 10 YEARS OLD AND OVER BY SEX

A BRIEF ANALYSIS

HIGHEST GRADE COMPLETED

Data on highest grade completed revealed an increasing percentage of better educated population. Of the private household population 7 years old and over, 56.33 percent completed some elementary education. A decrease of 3.48 percentage points occurring in this group in the last 5 years was due to an increase in the proportion of persons reaching secondary school. Persons with high school education constituted over a fifth (21.90%) of the population concerned, an increase of 3.28 percentage points. College undergraduates accounted for 7.20 percent and academic degree holders, 4.71 percent, an improvement of 1.96 and 1.17 percentage points, respectively. About one out of ten (9.52%) persons 7 years old and over in private households did not complete any grade while a meager proportion (0.34%) did not disclose their educational attainment.

A comparative breakdown of the private household population 7 years old and over by highest grade completed in 1975 and 1980 is shown in Table D.

A BRIEF ANALYSIS

**TABLE D – PRIVATE HOUSEHOLD POPULATION 7 YEARS OLD AND OVER
BY HIGHEST GRADE COMPLETED, PHILIPPINES: 1975 AND 1980**

Highest Grade Completed	1980		1975	
	Number	Percent	Number	Percent
Total	<u>37,606,278</u>	<u>100.00</u>	<u>32,929,465</u>	<u>100.00</u>
No grade completed	3,578,673	9.52	3,647,704	11.08
Elementary	21,184,392	56.33	19,694,821	59.81
High school	8,235,420	21.90	6,130,291	18.62
College	2,709,517	7.20	1,726,848	5.24
Academic degree holder	1,770,718	4.71	1,165,018	3.54
Not stated	127,558	0.34	564,783	1.71

A BRIEF ANALYSIS

Of those who completed an elementary education, 34.03 percent did not go beyond the third grade; 18.23 percent finished the fourth grade; 13.30 percent, the fifth grade and 34.44 percent, the sixth or seventh grade. Of those with high school education, 61.06 percent reached anywhere from the first to the third year and 38.94 percent were high school graduates. Only 18.26 percent of the college undergraduates completed the fourth or higher years while the rest finished only the lower collegiate years (Table 5).

LITERACY

The proportion of private household population 10 years old and over who are able to read and write decreased slightly from 83.36 percent in 1970 to 82.72 percent in 1980. (The readers are cautioned in their interpretation of figures based on the 1970 and the 1980 censuses. The data from these two censuses are not entirely comparable basically due to sampling errors. The 1970 data were derived from a 5% sample while the 1980 data, from a 20% sample.) A marked difference in literacy rate was observed between urban and rural residents, 92.50 percent for the former and 76.53 percent for the latter. The difference may be attributed to the existence of more schools and greater accessibility in urban than in rural areas.

FIG. 4 – PERCENTAGE LITERACY OF PRIVATE HOUSEHOLD POPULATION 10 YEARS OLD AND OVER BY SEX, URBAN-RURAL, PHILIPPINES: 1980

A BRIEF ANALYSIS

Overall, male literacy rate (82.82%) did not vary greatly from that of females (82.63%). This pattern was true for both urban and rural areas. Literacy rate stood at 93.04 percent for urban males and 92.00 percent for urban females. The corresponding figures in the rural areas were 76.70 percent and 76.35 percent.

LANGUAGE OR DIALECT

The Philippines is endowed with a diversity of over 87 languages and dialects. The ten leading dialects are generally spoken in an aggregate of 89.54 percent of private households: Tagalog is spoken in 3 out of 10 (29.66%) private households while Cebuano is the dialect of nearly a quarter (24.20%) of private households. Ilocano-speaking households comprise 10.30 percent and Hiligaynon or Ilongo-speaking households, 9.16 percent. About 3 out of 50 (5.57%) private households speak Bicol; 3.98 percent, Lineyte-Samarnon (Waray); 2.77 percent, Pampango or Kapampangan; 1.84 percent, Pangasinan; 1.06 percent, Maranao and 1.00 percent, Maguindanao. The remaining languages and dialects are each generally spoken by a fraction of a percent of the private households (Table 7).

A BRIEF ANALYSIS

INDUSTRY AND GAINFUL OCCUPATION

Of the 27,734,739 private household population 15 years old and over, 14,173,685 or 51.10 percent have gainful occupations. This indicates a slight improvement of 0.32 percentage point over the 1975 proportion. As can be expected, the proportion of gainful workers is higher among males (79.82%) than among females (23.24%). Overall, the proportion of gainful workers is higher in urban areas (52.12%) compared with that in rural areas (50.44%). While a higher proportion of female workers (32.65%) is found in urban than in rural areas (16.69%), the reverse is true with the males. Rural male workers comprise 83.54 percent; urban male workers, 73.76 percent (Table 8).

Although majority (51.47%) of the gainful workers are still employed in agriculture, fishery and forestry, this proportion is relatively lower by 1.91 percentage points compared with that in 1975. The reduction in the proportion employed in this sector is indicative of the government's effort to improve the non-agricultural industries. Likely to have absorbed the shift of work force are industries engaged in financing, insurance, real estate and business services; transportation, storage and communication; construction; electricity, gas and water; and mining and quarrying. Other non-agricultural industries, however, registered lower proportions of workers (Table E).

**TABLE E – GAINFUL WORKERS 15 YEARS OLD AND OVER
BY MAJOR INDUSTRY GROUP, PHILIPPINES:
1975 AND 1980**

Major Industry Group	1980		1975	
	Number	Percent	Number	Percent
Total	<u>14,173,685</u>	<u>100.00</u>	<u>11,917,720</u>	<u>100.00</u>

Agricultural, animal husbandry and for- estry workers, fish- ermen and hunters	6,969,013	49.17	6,312,499	52.97	6,074,301	51.83
Production and related workers, transport equipment operators and laborers	2,921,369	20.61	2,349,643	19.72	2,549,087	21.75
Workers not classifia- ble by occupation	330,588	2.33	141,225	1.18	165,224	1.41

Regardless of the industry the gainful workers are engaged in, Table F presents the distribution of the gainful workers by their usual occupation for three censal years. Agricultural, animal husbandry and forestry workers, fishermen and hunters, by far the biggest occupation group, comprise 49.17 percent of all gainful workers 15 years old and over. This proportion is lower by 3.80 percentage points than the 1975 proportion which gained slightly by 1.14 percentage points during the period 1970-1975.

Consistently retaining the second rank but with a slight increase of 0.89 percentage point, production and related workers, transport equipment operators and laborers constitute 20.61 percent in 1980. Between 1970 and 1975, a 2.03 percentage-point decline was experienced by this group. A gradual but steady rise in the proportion of service workers and clerical and related workers has been observed since 1970. Service workers, still third in rank, make up 8.74 percent, increasing by 0.46 percentage point during the first half of the seventies and by 0.84 percentage point during the latter half. The corresponding proportion for clerical and related workers is 4.68 percent or increases of 0.85 percentage point and 0.60 percentage point for the same periods. Professional, technical and related workers account for 6.60 percent while administrative, executive and managerial workers form the

A BRIEF ANALYSIS

smallest group as their proportion dropped from a meager 1.15 percent in 1970 to 1.11 percent in 1975 and to 0.74 percent in 1980. Not to be discounted are workers whose jobs are not classifiable by any of the major groups; these workers constitute 2.33 percent, nearly twice their 1975 proportion (1.18%).

MIGRATION

Of the 40,285,589 private household population 5 years old and over in 1980, 92.93 percent were residing in the same city or municipality where they had lived exactly five years ago. Those whose present residence differed from their place of residence on May 1, 1975 were distributed as follows: 2.90 percent had then resided in another city or municipality of the same province; 3.99 percent, in another province and 0.18 percent, in a foreign country.

A BRIEF ANALYSIS

In-migration to urban areas was heavier than that to rural areas as indicated by a lower proportion (89.27%) of urban populace 5 years old and over residing in the same city or municipality in 1975 and 1980, compared with 95.16 percent among residents in rural areas.

In terms of intra-provincial and inter-provincial in-migration, urban and rural males were less mobile than their female counterparts. Of the private household males 5 years old and over, 3.61 percent were intra-provincial in-migrants and 6.16 percent were inter-provincial in-migrants. The corresponding figures for females were 3.79 percent and 7.17 percent. Meanwhile, urban males and females were more mobile than their rural counterparts. On the other hand, the same proportions were observed for both sexes with respect to migration from foreign countries; the proportion migrating to urban areas was more than twice that moving to rural areas (Table 10).

TYPE OF BUILDING

Most (90.89%) of the total households in the country are occupying single houses. This figure is only 1.44 percentage points higher than the corresponding proportion (89.45%) ten years ago. The rest of the households live in apartments/accesorias/condominiums/row houses (4.02%), duplexes (2.22%), improvised structures such as barong-barong (2.22%), commercial/industrial/agricultural buildings (0.53%), other housing units like natural shelters (0.05%), hotels, lodging houses, dormitories (0.03%), institutions such as hospitals or convents (0.02%) and other collective living quarters (0.02%).

**TABLE G — NUMBER OF HOUSEHOLDS IN OCCUPIED DWELLING UNITS
BY TYPE OF BUILDING, PHILIPPINES: 1970 AND 1980**

Type of Building	1980		1970	
	Number	Percent	Number	Percent
Total	<u>8,607,187</u>	<u>100.00</u>	<u>6,163,128</u>	<u>100.00</u>
Single house	7,822,708	90.89	5,512,966	89.45
Duplex	191,386	2.22	150,410	2.44
Apartment/accesoria/condominium/row house/etc.	345,866	4.02	220,745	3.58
Improvised (barong-barong)	191,097	2.22	224,610	3.64
Commercial/industrial/agricultural	45,718	0.53	53,357	0.87
Other housing unit: natural shelter, boat, etc.	3,983	0.05	—	—
Hotel, lodging house, dormitory, etc.	2,405	0.03	—	—
Institutional (hospital, convent, school dormitory, etc.)	2,226	0.02	1,034	0.02
Other collective living quarters (military camp, etc.)	1,798	0.02	6	0.00

A BRIEF ANALYSIS

A little over two-thirds (66.73%) of the households residing in single houses are in the rural areas while the rest are in the urban areas. Similarly, nearly two-thirds or 63.90 percent staying in other collective living quarters like military camps are rural households. On the other hand, more households in duplexes (70.88%), apartments/accesorias/condominiums/row houses (91.98%), improvised structures (61.39%), commercial/industrial/agricultural buildings (85.19%), hotels, lodging houses, dormitories (66.28%), institutional buildings (83.69%) and other housing units (58.22%) are in the urban areas (Table 1).

TYPE OF OCCUPANCY

Table 1 shows that 80.20 percent of the total households are owners of their dwelling units. The rest of the households are either tenants/lessees (11.89%), subtenants/sublessees (0.52%) or rent-free occupants (7.39%).

Ownership of dwelling units is more common in rural (89.65%) than in urban (64.38%) areas. On the other hand, tenancy/leasehold is more common in urban (25.11%) than in rural areas (3.99%). Likewise, the proportion of subtenants/sublessees is greater in the urban (0.86%) than in the rural areas (0.31%) and so with the free-renters, 9.65 percent and 6.05 percent, respectively.

CONSTRUCTION MATERIALS OF ROOF AND OUTER WALLS

The total households in the country are almost equally divided between the use of strong roofings (50.46%) such as galvanized iron/aluminum, tile/concrete/brick/stone and asbestos and light materials (49.54%) such as cogon/nipa, makeshift/salvaged materials or other materials like anahaw. Households in dwelling units with roofs of strong materials are a common sight in the urban areas (74.10%) while the reverse is true in the rural areas where 63.66 percent have roofs of light materials.

By type of construction materials of outer walls, approximately three-fifths (59.08%) of the total households reside in units with walls of strong materials (galvanized iron/aluminum, tile/concrete/brick/stone, wood/plywood, mixed tile/concrete/brick/stone and wood/plywood, and asbestos) while the rest (40.92%) have walls of light materials (bamboo/sawali, cogon/nipa, makeshift/salvaged materials, and others such as anahaw, etc.). Outer walls of strong materials are common in urban areas with 81.85 percent of the households using them, while majority (54.53%) of the rural households have outer walls of light materials (Table 2).

YEAR BUILT

More than one-third or 39.18 percent of the total households are occupants of structures built in 1976-1980; 22.42 percent, during 1971-1975; 21.26 percent, 1961-1970 and 10.58 percent, 1951-1960. Only 3.90 percent live in buildings built during 1942-1950 and 2.66 percent, before World War II.

There are more rural households (69.50%) living in newly constructed buildings (1971-1980) than urban households (48.39%). Consequently, less rural households (30.50%) stay in old (1970 or earlier) buildings than urban households (51.61%) (Table 2).

FLOOR AREA OF DWELLING UNIT

More than half of the total households (55.52%) in the country occupy dwelling units with floor area of less than 30 square meters. A little over one-fourth or 26.95 percent live

A BRIEF ANALYSIS

in units of 30-49 square meters. The rest are distributed as follows: 7.56 percent in units of 50-69 square meters; 4.52 percent, 70-99 square meters; 2.74 percent, 100-149 square meters; 1.19 percent, 150-199 square meters and 1.52 percent, in more spacious units of 200 square meters or over.

Majority (54.82%) of the urban households have dwelling units of at least 30 square meters in floor area while a greater number of the rural households (61.71%) occupy units of less than 30 square meters (Table 3).

TENURE OF OWNER-OCCUPANT WITH RESPECT TO THE LAND

Of the 6,903,044 households that own their dwelling units, 62.26 percent also own the land where the structures are erected. About one-third (29.66%) of these owners are in the urban areas while the rest (70.34%) are rural households.

Some households who own their dwelling units are lessees/sublessees (10.99%) and farm lessees/agricultural tenants of landowners (9.26%). Only 5.07 percent have other forms of legal tenure with respect to the land while 12.42 percent have no tenure such as squatters (Table 4).

SOURCE AND USE OF WATER SUPPLY

The faucet, community water system is the most common source of water supply used by the households for drinking (31.05%), for kitchen use (28.82%) and for washing clothes (25.63%). Tubed/piped deep well ranks next with 21.57 percent of the households depending on it for drinking water, 21.52 percent for kitchen use and 19.27 percent for washing clothes. The dug well comes close to the deep well in terms of number of households depending on it for water supply — 19.75, 21.56 and 18.07 percent, respectively, for the three uses. Although water from lake, river, stream, irrigation, etc. is used by a small number of households for drinking (1.45%) and kitchen purposes (2.30%), it is utilized by 14.99 percent of the households for washing clothes.

In the urban areas, majority of the households depend on the faucet, community water system for drinking (58.07%), for kitchen use (53.90%) and for washing clothes (50.88%). For these three uses of water, about one-fourth of the total households depend on tubed/piped deep well, one-tenth on tubed/piped shallow well and the rest, on dug well, spring, rain, lake, river, stream, irrigation, etc.

On the other hand, water from dug well is most commonly utilized by rural households for drinking (28.26%), for kitchen use (29.76%) and for washing clothes (23.74%). Tubed/piped deep well is used by 19.82 percent for drinking, 19.04 percent for kitchen use and 15.76 percent for washing clothes while the tubed/piped shallow well is utilized by 15.50, 15.43 and 13.43 percent, respectively. Only 14.91, 13.83 and 10.55 percent depend on faucet, community water system for drinking, kitchen use and washing clothes, respectively. While water from lake, river, stream, irrigation, etc. is used by only 2.16 percent for drinking and 3.37 percent for kitchen purposes, over one-fifth (21.68%) utilize these sources for washing clothes.

KIND OF LIGHTING FACILITIES

Although majority (59.91%) of the households in the country still use kerosene for lighting, the number of households using electricity increased by 14.20 percentage points in a span of ten years (from 23.18% in 1970 to 37.38% in 1980). Liquefied petroleum gas is

A BRIEF ANALYSIS

now also utilized for lighting by 1.93 percent of the total households. Oil and other kinds of lighting facilities are used by 0.12 and 0.66 percent of the households, respectively.

In the urban areas, electricity is used by majority (71.30%) of the households and kerosene, by only 27.39 percent. The reverse is true in rural areas where 79.33 percent of the households use kerosene and only 17.12 percent utilize electricity for lighting (Table 5).

COOKING FUEL

Despite a decrease of 7.44 percentage points in a span of ten years, majority (72.20%) of Filipino households still use wood or charcoal for cooking. The percentage of households using liquefied petroleum gas (11.74%), kerosene (11.12%), electricity (3.45%) and other types of cooking fuel (1.49%) increased since 1970. However, the increment was most evident for liquefied petroleum gas with only 5.71 percent of the private households using it in 1970.

In the urban and rural areas, wood or charcoal is used by 45.50 and 88.22 percent, respectively, of the total private households. Second in rank is liquefied petroleum gas for the urban areas (27.27%) and kerosene for the rural areas (6.73%). Electricity is the least used for cooking among rural households (0.81%) while for the urban areas, other types of cooking fuel is used by the least number of households (1.00%).

TOILET FACILITIES

Although the water-sealed toilet with sewer/septic tank or other depository is used by 48.67 percent of the total private households, a large number (18.01%) still have no toilet facilities at all. The closed pit (antipolo, etc.) and open pit types are also common with 16.73 and 14.80 percent of the households, respectively, using them. Other types of toilet facilities such as the pail system are utilized by only 1.79 percent of the households.

In the urban areas, majority or 72.51 percent of the private households make use of the water-sealed toilet with sewer/septic tank or other depository while the closed pit type follows far behind with 10.36 percent using it. On the other hand, approximately one-third or 34.42 percent of the rural households use the water-sealed type whereas slightly over one-fifth or 22.87 percent have no toilet facilities.

OWNERSHIP OF RADIO, TELEVISION SET AND REFRIGERATOR/FREEZER

Living conditions have improved in the past ten years as evidenced by the increase in the proportion of households owning radios (from 48.65% in 1970 to 65.25% in 1980), television sets (5.48% to 16.17%) and refrigerators or freezers (5.46% to 12.95%). Majority of the households in both the urban (74.18%) and rural (59.90%) areas own radios.

CERTIFICATION

I HEREBY CERTIFY that the data set forth in this form were personally obtained by me in accordance with the rules and regulations promulgated by the National Census and Statistics Office.

Name of person accomplishing this form
(Printed Name & Sign)
Title _____
Date _____ 1980

PERSONS TO BE ENUMERATED AS MEMBERS OF COLLECTIVE HOUSEHOLDS

1. HOTELS, LODGING HOUSES, DORMITORIES, ETC.

- a. Proprietor, manager and employees living in the establishment, except those living therein with their own families and those who usually go home to their respective families at least once a week.
- b. Permanent lodgers/boarders (those who have stayed or expect to stay for one year or longer) and those temporary lodgers/boarders who have stayed for six months or longer as of May 1, 1980 or have been away from their own families for the same period. However, exclude those who usually go home at least once a week.
- c. Lodgers/boarders who are not residents of the Philippines and who have been in the Philippines for one year or longer as of May 1, 1980, or expect to stay in the Philippines for one year or longer. However, exclude those who have temporary place of residence elsewhere in the Philippines to where they usually go home. Exclude also diplomatic representatives or UN, ILO or USAID officials who, like diplomatic representatives, are subject reassignment to other countries after their tour of duty in the Philippines, and members of their families.

2. HOSPITALS AND NURSES' HOMES

- a. All patients, including those just confined, in mental hospitals, leprosaria or leper colonies, pavilions of tuberculous sanatoria where patients stay more or less permanently, and rehabilitation centers for drug addicts.
- b. Patients who have been confined for six months or longer as of May 1, 1980 in other kinds of hospitals and in wards for temporary confinement in tuberculous sanatoria.
- c. Nurses in nurses' homes who do not usually go home at least once a week.
- d. Staff members and employees living in hospitals/nurses' homes, except those living therein with their families and those who usually go home at least once a week.

3. WELFARE INSTITUTIONS (Homes for the Aged and Infirm, Orphanage, Boys' Town, etc.)

- a. All inmates or wards, including those just confined.
- b. Staff members and employees living in the institutions, except those living therein with their families and those who usually go home at least once a week.

4. CORRECTIVE AND PENAL INSTITUTIONS

- a. All prisoners in national prisons and reformatories (welfareville).
- b. Prisoners and detainees in provincial or city/municipal jails who have been continuously confined for six months or longer, including confinement elsewhere, as of May 1, 1980, or those whose sentence is for six months or longer even if the sentence is on appeal.
- c. Staff members and employees living in the institutions except those living therein with their own families and those who usually go home at least once a week.

5. CONVENTS, NUNNERIES, SEMINARIES, AND BOARDING SCHOOLS

- a. Monks, priests, ministers, nuns, seminarians etc. However, priests or ministers of sects other than the Roman Catholic Church who live in the convent or house close to church or chapel with their own families are to be excluded (private households).
- b. Students in boarding schools (schools where students are required to stay in the school campus).
- c. Staff members, employees and helpers living in the premises, except those living therein with their own families and those who usually go home at least once a week.

6. MILITARY CAMPS AND STATIONS (PC, Army, Air Force and Navy): PMA

- a. Officers and enlisted men/draftees, except those who live in the premises with their own families and those who usually sleep most nights with private households or in hotels, lodging places or dormitories. Include those belonging to the unit in the camp or station who are away on military operation or mission or aboard naval vessels, except those whose families are living in the camp or station (their own families will report them).
- b. PMA cadets and trainees whose training is for six months or longer.
- c. Detainees who have been continuously confined for six months or longer, including confinement elsewhere, as of May 1, 1980.
- d. Civilian employees living in the camp or station, except those living therein with their own families and those who usually go home at least once a week.

7. LOGGING, MINING AND CONSTRUCTION/PUBLIC WORKS CAMPS: PLANTATIONS AND AGRICULTURAL/FISHERIES EXPERIMENTAL OR BREEDING STATIONS, ETC.

- a. Proprietor, manager, contractor and employees who do not live with their families in the premises and are supplied lodging (beddings, etc.) and/or meals by the company, firm, contractor or agency, except those who usually go home at least once a week.

8. OCEAN-GOING AND INTERISLAND/COASTAL VESSELS OR DEEP-SEA FISHING VESSELS

- a. Filipino crew members of ocean-going vessels (whose own families live in the Philippines) at port as of 12:01 A.M. May 1, 1980, except those who usually go home to their own families in the Philippines at least once every six months.
- b. Any crew member of interisland/coastal vessel or deep-sea fishing vessel at port on any day during the enumeration, if the crew member has no home other than the vessel.

9. REFUGEE CAMPS

- a. Filipino citizens working and living inside the camps.
